

Scheduled Tree Maintenance Procedures

To help avoid electric service interruptions, BPU trims trees in the public right-of-way based on a scheduled growth cycle.

A customer door hanger is left on the home by BPU's vegetation contractors. Also, a call is made giving customers advanced notice that tree trimming is scheduled for their area.

Owner is responsible for trimming trees around the service line. BPU can lower the service line for a small fee before you trim. Just ask for our Line Drop Service at 913-573-9535.

To notify you that tree trimming is planned for your neighborhood, BPU must have your correct phone number.

Tree service companies contracted by BPU are responsible for tree debris removal once cycle maintenance trimming is complete.

For tree trimming issues/concerns, please call 913-573-9900. Visit bpu.com for more information.

BPU offers free advice on tree trimming and planting the right tree in the right spot. Just call and leave your name and phone number.
