

COMMERCIAL INCENTIVES SUMMARY

Commercial Heat Pumps

New Installations or Heat Pumps Replacing Gas	\$50.00/ton
--	-------------

Commercial Electric Resistance

New Installations or Electric Resistance Replacing Gas	\$10.00/1CW
---	-------------

1. Electric Resistance Incentives will not be paid when resistance heat is used as backup heat or emergency heat.
2. If resistance heat is designed to operate in tandem with heat pump installations, the customer may receive both incentives. This condition must be shown in heat loss statement and attested to by installing contractor.
3. Heat loss/heat gain calculations must be submitted by contractor or signed heat load calculation from project engineer, and must be submitted prior to incentive being released.
